

AGILITA AG

Digital Transformation & Cloud Scalability Executive Summary & Implementation Strategy

“Get Us Ready to Scale”
– Standardizing core operations with SAP

Prepared by: Functional Consultant
SAP Project Implementation Team

CUSTOMER AND INDUSTRY CONTEXT

Industry Macro Trends:

- **Shift to Public Cloud ERP:** Organizations moving to standard cloud ERPs (S/4HANA Cloud) for scalability.
- **Cross-Border Talent Integration:** Rising need to manage and settle resources across international subsidiaries.
- **Embedded AI & Automation:** Integrating copilot (SAP Joule) to cut routine administrative overhead.

Key Challenges Linked to Business Goals:

- **Workforce Scaling Strain:** Employee count surged from 92 to 190, requiring automated HR onboarding and structured talent development in SAP SuccessFactors.
- **Cross-Border Complexity:** Expanding into Berlin, Germany caused fragmented financial tracking, establishing the goal to automate Swiss-German intercompany settlements.
- **Resource & Licensing Inefficiencies:** A 100% surge in project volume led to a lack of visibility, driving the goal to centralize resource allocation and software licensing under one ERP.

ANALYSIS APPROACH

Strategic & Human-Centered
Evaluation Frameworks

Design Thinking Analysis Approach

Empathizes directly with internal end-users — project managers, team leaders and consultants — to address real operational pain points. It validates a “stick to the standard” cloud strategy in SAP SuccessFactors and Project Management to reduce administrative burdens and streamline onboarding without complex, costly customizations.

SWOT ANALYSIS

Strengths:

Recognized SAP Gold Partner with deep cloud delivery expertise and an award-winning implementation track record.

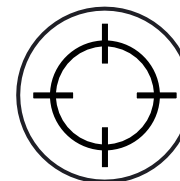

Weaknesses:

Operational bottlenecks in HR and PM from rapid doubling (92 to 190 staff) and disconnected Swiss-German intercompany billing.

Opportunities:

Accelerate European cloud ERP growth (GROW with SAP) and embed SAP Joule AI to automate workflows.

Threats:

Heightened competition for IT consulting talent and delivery risks if business expansion outpaces operational controls.

PROJECT TEAM & COLLABORATION

Project Team & Key Roles

- **Project Manager:**
Establishes governance, controls the 9-month timeline, tracks deliverables and enforces a “stick to standard” cloud methodology.
- **Functional Consultant (My Role):**
Maps HR, resource management, and billing workflows into SAP SuccessFactors and S/4HANA Cloud to eliminate operational bottlenecks.
- **Technical Consultant:**
Leads cloud integrations across SAP S/4HANA Cloud and BTP, automating Swiss-German intercompany settlement rules.
- **Data Analyst/Key Users:**
Builds management dashboards in SAP Analytics Cloud to give leadership real-time visibility over consultant availability and margins.

Collaboration Framework

- **Project Kick-off & Alignment:**
Conduct cross-office kick-off sessions with Swiss and Berlin stakeholders to establish shared project milestones and ownership.
- **Functional – Technical Alignment:**
Translate business and HR pain points directly into standard SAP cloud configurations through iterative sprint reviews.
- **Stakeholder Engagement:**
Partner closely with internal team leaders and project managers to streamline onboarding and maintain high user adoption.
- **Continuous Feedback Loops:**
Run regular validation checkpoints to ensure system usability and transparent cross-border reporting before go-live.

FUTURE ROADMAP

- **Deploy SAP Joule:** Integrate SAP's generative AI copilot to automate internal queries and project administrative reporting.
- **Expand SAP SuccessFactors:** Roll out the automated onboarding module to accelerate ramp-up times for new hires across all business units.
- **Continuous Cloud Innovation:** Leverage standard bi-annual SAP cloud release cycles to maintain clean-core scalability as European expansion continues.

MEASURABLE VALUE DELIVERED

- ✓ **10–15% Time Savings:** Freed up project management office (PMO) capacity to focus on high-value client advisory.
- ✓ **5% Cost & Overhead Reduction:** Lowered overall IT licensing costs and cut routine administrative effort.
- ✓ **100% Resource Transparency:** Established complete visibility into consultant availability, project margins, and automated Swiss-German intercompany billing.

Business Impact & Future Roadmap
